

Admin Flow – Essential Features Only

Dashboard

Typical Usage:

1. Admin logs in
2. Uploads legal documents
3. System processes RAG (chunk + embed)
4. Admin monitors:
 - Queries
 - AI responses
 - Logs/errors
5. Admin blocks abusive users if needed
6. Adjusts language/system settings

1. Admin Authentication Screen

Screen: LoginPage

Features:

- Admin login (email + password)
- Secure JWT session

Actions:

- Login
- Logout

2. Dashboard (Home Screen)

Screen: AdminDashboardPage

Features:

- Quick system overview

Display:

- Total Users
- Total Queries
- Total Documents
- Total Errors

Actions:

- Navigate to other modules

3. Document Management (RAG Control – MOST IMPORTANT)

Screen: DocumentManagementPage

Features:

- Upload legal documents (PDF)
- View all documents
- Delete documents
- Trigger processing (chunking + embedding)

Table View:

- Document Name
- Language
- Status (Processed / Pending)
- Upload Date

Actions:

- Upload document
- Process document (generate embeddings)
- Delete document

Core system feature (controls AI accuracy)

4. RAG / Knowledge Monitoring

Screen: `KnowledgeBasePage`

Features:

- View indexed chunks
- Check embedding status

Display:

- Document ID
- Number of chunks
- Embedding model used
- Status

Actions:

- Re-process document (optional)
- View chunk details (optional)

5. Query Monitoring

Screen: `QueryMonitoringPage`

Features:

- View user questions + AI answers

Table:

- Query text
- Response preview

- Language detected
- Timestamp

Actions:

- View full conversation
- Filter by language (optional)

Helps evaluate multilingual + AI quality

6. AI Logs & Traceability

Screen: `LogsPage`

Features:

- Track AI activity

Display:

- Correlation ID
- Model used
- Tokens used
- Response length
- Timestamp

Actions:

- View log details
- Search logs

Required for debugging + research traceability

7. Error Monitoring

Screen: `ErrorMonitoringPage`

Features:

- View system failures

Display:

- Error type (LLM / DB / API)
- Error message
- Timestamp

Actions:

- View error details

8. User Management (Simple Version)

Screen: `UserManagementPage`

Features:

- View users
- Block / unblock users

Table:

- User ID
- Email (masked)
- Status (Active / Blocked)
- Created Date

Actions:

- Block user
- Unblock user

9. Simple Analytics

Screen: `AnalyticsPage`

Features:

- Basic usage insights

Display:

- Queries per day
- Language distribution (EN / SI / TA)

Actions:

- View trends

10. System Settings

Screen: `SettingsPage`

Features:

- Basic configuration

Options:

- Enable/disable languages
- Set default language
- Toggle translation pipeline

Actions:

- Save settings
